DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 17, 22, 23, 37, 42, and 43, drawn to a subcombination, classified in class 714, subclass 21.
 - II. Claims 46-52, drawn to a combination, classified in class 714, subclass 11.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, details of “checking validity of each redundant pair computer systems” presented in the subcombinations are not required for patentability of the combination. The subcombination has separate utility such as the computer system with multiple computers, equipped onboard a motor vehicle, automatically control the stability of a vehicle if one the computer malfunctioning.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art shown by their different classification, restriction for examination purpose as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
